Company Profile

SHRI CHIMANBHAI HAPANI
FOUNDER

A versatile Entrepreneur by profession besides being a unique Craftsman with lots of insight, Shri Chimanbhai Hapani succeeded in developing indigenously at RAJKOT (Gujarat, India) an architectural hardware items matching the standards of Export Market expectations.

The triumph laid foundation for beginning of KICH INDUSTRIES as an exclusive Export Oriented Unit in 1992. KICH Product quality gained enviable CUSTOMER ACCEPTANCE abroad and order flow kept on swelling year after year. This trend has continued enriching our experience and capability to innovate & match NEW DESIGN expectations.

Meanwhile, the family tradition of craftsmanship & entrepreneurship magnified with the active support from his three sons, Mr. Bharat Hapani (Managing Director)- Who efficiently run the firm Kich Architectural Products Pvt. Ltd. with his vast experience and immense market knowledge. Mr. Nitin Hapani (Director: Manufacturing) -Who excelled himself in manufacturing and product development, Mr. Dinesh Hapani (Director: Exports)- Who has specialized in Overseas marketing as well as managing corporate clientele.

In 1998, Ms. Chetna Mistry, an Interior Designer, with the support of her husband Mr. Jagdish Mistry, a prominent Award winning Architect from MUMBAI decided to contribute their might towards marketing of KICH Architectural Products in INDIA under the banner of NEKI CORPORATION.

A dynamic duo indeed !!! KICH-NEKI association has worked wonders in the multi - faceted growth of KICH Product Range in Indian sub-continent.

As present Business Environment is dominated by acute competition, better and better products are being rolled out from indigenous as well as international manufacturers. This necessitates manufacturing of precision products only to achieve consistent sales & to build sound brand image.

KICH Products are manufactured under ISO 9001:2008 norms only in order to exercise Total Quality Control. We also have R & D division besides having in-house Design Studio and Tool Room to Innovate and Develop New Design Dies, Jigs & Fixtures.

The plant possesses latest machinery as well as indigenous machines duly modified to suit objectives. KICH boasts of Unmatched finish through use of Advanced Polishing Processes & Devices.

At KICH, We ensure optimum Strength & Durability deploying meticulous care in every stage of Manufacturing.

Our Achievements

KICH FIRST...

- (1) The First and only Winner of National Award for Best Quality in Premium Architectural Products Category.

- (2) Kich is the first and only company selected for I-Mark (India Design Mark) certification of handrail and baluster systems under premium architectural products category. It is a certification granted by India Design Council, a National Strategic Body for multi-disciplinary Design in India, to those products which have high aesthetic design value, superior user potential, world-class quality and environment friendly composition.

- (2) The first and only company selected as Indian Power Brand 2011-13 in architectural products category by Indian Council for Market Research. Indian Power Brand is a research driven anthology listing out most powerful Indian companies which are successfully taking on and beating their global competitors in their unique ways.

- (3) The First Member of IGBC in Architectural Hardware Products promoting the Green Building Movement in India. (IGBC - Indian Green Building Council)

- (4) The first and only company selected as Star Brand 2010-2011 in architectural products category. This honour is awarded to Kich as a conclusion of Pan-India research conducted by The Indian Council for Market Research (ICMR) on the most impact creating Brands of the country.

Shri Chimanhai Hapani receiving NATIONAL AWARD for BEST QUALITY from His Excellency, The President of India, Dr. A.P.J. Abdul Kalam at New Delhi.

- (5) The First and only Indian company to have its products successfully tested for Mechanical and Product life cycle standards by world's largest Bodycote testing group.

- (6) The First and only Indian company having Architectural Hardware Products certified for Fire Safety Standards by Warrington Fire-The leading independent fire testing group of the world.

- (7) The First ISO 9001:2008 Certified Indian Company having Corrosion Resistant High Grade AISI 316 Stainless Steel Architectural Products

- (8) The First Company to launch Bathroom Accessories in AISI 316 Stainless Steel

- (9) The First Company to have 'Knock-down' Handrail & Balustrade System

Quality Assurance

Quality Aspects alone determine ultimate fate of any product or brand. At KICH, Quality Norms under ISO 9001:2008 and International Standards for Quality Management are deployed to give valuable edge to all products. Strict Quality Control Measures are exercised at every stage, from Input of Raw Material to Finished Products.

Our MISSION & VISION continues to serve you in your aspirations through our Marketing Team aptly supported by our Dealer Network all across the country.

WE BELIEVE that EXCELLENCE is linked with a total commitment to QUALITY and SERVICE.

WE REALIZE that SUCCESS depends on RELIABILITY.

AND SO WE SHALL ALWAYS ENDEAVOR TO EXCEED YOUR EXPECTATIONS.

Technical Advantages

What Makes our products Unique...

The first and foremost factor affecting reliability as well as cost of any product is its Raw Material. Almost all KICH products as well as their internal components are developed from Stainless Steel confirming to AISI 316 Grade Stainless Steel which is Highly corrosion resistant and resist the adverse effects of chemicals.

The following table presents main elements (forming the Chemical composition) of AISI 316 Grade Stainless Steel as compared to other cheaper grade steel such as 304, 202 or even claimed to be 316 by many other manufacturers.

Chemical Composition In Percentage

Element %	202 Grade	304 Grade	316 Grade	Implications
Carbon	0.15	0.08	0.08	Increase in percentage decreases the corrosion resistance.
Silicon	1.00	1.00	1.00	-
Manganese	7.5 to 10.0	2.00	2.00	Affects the magnetic characteristic and hardness of Iron
Phosphorus	0.06	0.045	0.045	-
Sulphur	0.03	0.03	0.03	-
Chromium	17.0 to 19.0	18.0 to 20.0	16.0 to 18.0	Addition of 12% forms stainless steel from ordinary steel. Removes the corrosive effect of Carbon. Forms a passive film which prevents oxidation & consequent corrosion.
Molybdenum (MOLY)	NIL	NIL	2 to 3	Molybdenum increases the corrosion resistance. It has a superior tensile strength at high temperature as compared to 304 Grade steel. This element can resist major chemical reaction and thus being a very costly element.
Nickel	4 to 6	8.0 to 10.5	10.0 to 14.0	Nickel provides corrosion resistance, increases strength in both high & low temperature, increases toughness in low temperature and lowers the effects of work hardening. Thus higher percentage makes the steel superior in quality.

Effect of Chemical Testing done by our R & D department on various Grades of Stainless Steel Handles

Before Test

Effect on 202 Grade

Effect on 304 Grade

Effect on AISI 316 Grade

Technical Advantages

Key Features Of AISI 316 Grade Stainless Steel

From the given table and chemical tests conducted by our R & D department, few unique characteristics of AISI 316 Grade Stainless Steel are simplified and summarized below :

- It can withstand the corrosion caused by atmospheric / environmental or major chemical reactions.
- It can resist high temperatures without going under any deformity which makes it highly recommended for fire safety doors in any building.
- It has remarkable creep strength and Rupture strength.
- It repels the Bacteria which makes it ideally suitable material for the venues such as Hospitals, Educational Institutes, Hotels and even at home and office where higher degree of hygiene is required
- Due to its natural finish, Product does not require regular cleaning or maintenance making it most suitable for public places.

Why KICH ?

"Quality Can not be Defined, It can only be Experienced"

- KICH products are made of Corrosion Resistant High Grade AISI 316 Stainless Steel while other manufacturers use 304 or 202 common steel grades.
- KICH products are made out of 1.5mm metal thickness compared to 1.2 mm thickness offered by standard manufacturers.
- Our Mortise handles, Pull handles and many other products are enhanced with high grade brass bushing which can tolerate forceful and intense use of doors.
- Long bush accommodates more threads increasing strength and life cycle of products.
- Specially developed Fixing Stud and Grubs ensure accurate fitting of handles and eliminates shaking of handles which may sometime even lead to breaking of glass doors.

Things Looking similar may be Quite Different Inside !

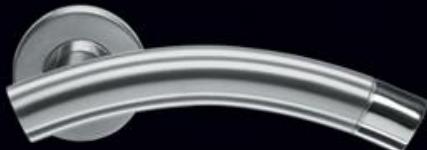

As KICH products are manufactured only from the Highest Quality raw material with utmost meticulousness, a little higher cost is unavoidable, however considering:

- High benefit/cost ratio
- Lifetime trouble free functioning with zero maintenance cost
- Longer Life cycle cost analysis
- Prompt Pre & After Sale services

KICH products assure peace of mind and the best reward for money spent by the customer.
